Activities

Graphic Design

Self taught in Photoshop, I started an Instagram account for posting some graphics I designed and amassed over 1.5k followers. This led to me getting some one-off clients, for whom I have designed and made Instagram posts, event posters and business cards.

Football

Playing for teams when I was younger and switching to help coaching as I got older, I was involved in football for most of my mouth. Still an avid fan and play with friends when possible.
